PORTFOLIO CASE STUDY / BANKING ANALYTICS

Loan Portfolio Analysis

Power BI project preview | Danish Syed

Illustrative reconstruction using synthetic figures

Applied	Approved	Disbursed	Recovered
$24.0M	$16.8M	$14.4M	$3.6M

Where does requested funding drop off?

Loan origination amounts | USD millions

What I would investigate next

70% of requested dollars were approved; 60% were disbursed.

Compare the approval-to-disbursement gap by product, channel and branch.

Track recoveries separately by loan vintage; they are not an origination stage.

SYNTHETIC DEMO / No customer records or source model included.
